

Supporting your families to be water safe

Thank you for prioritising water safety in your Early Education Centre.

Your commitment makes a significant difference in safeguarding your families and contributes to a safer community. Here are the crucial steps:

Four Simple Steps:

1

Put the poster up

Display it prominently in your centre to spark curiosity and awareness.

2

Apply for your ECE library packs

Access our water safety education resources that you can use and lend to the families that need the most support.

3

Share water safety information

Actively share the parent information we send to you as it arrives, keeping parents informed.

4

Discuss water safety with parents and children

Engage in meaningful conversations, help parents to stay active in their child's learn to swim journey.
